- SuperHitch Magnum 20K/30K requires the use of Tie Down R3504 or Talon Tie Down R3504A
- Drilling may be required into the Spring Hanger Bracket which is welded to the frame Drilling may be required for Installation
- May require modifications to the running board / bed access steps brackets to install Tie
- Additional labor required for installation of Tie Downs
- Front Tie down is available in adjustable Tie Down style only Fits Classic Body Style only

- Will also work on vehicles without a hitch receiver
 The Toyota HD Tow package attaches to the side and bottom of the vehicles frame. The Standard Toyota Tow package attaches to the bottom of the vehicles frame only
 10 To determine the correct fit: 1500 & 2500 model / Classic body style vehicle owners must
- measure the vehicle frame height at the back of the truck next to the spare tire. If the frame is 5.5" tall it requires the LD application, If the frame is 8" tall it requires the HD application 11 Will work with aftermarket hitches that do not have side plates that attach to the bottom of
- 12 Tie down requires 4"x4" footprint on the side plate of the aftermarket hitch in order to install.
- Drilling is required for install. 13 Works on vehicles without a hitch reciever
- 14 Dually applications may require the use of (#A7004 Dually Adapter Kit) Measure from front of camper slide in point to the rear anchor point. If total is 90° or less, use Dually Adapter Kit
 15 Requires a Factory installed hitch reciever with an open ended cross tube

- 16 Designed to work with the factory installed running board / bed access steps that extends past the cab and onto the bed, Tie Down is not adjustable in height.

 17 SuperHitch Magnum 20K/30K D1102M requires R3503/ R3503A rear tie downs SuperHitch Magnum 20K D1101M requires R3503/R3503A Rear TD

 18 Toyota Tacoma's with a 5' bed & running boards / bed access steps under the cab will need to remove the running boards / bed access steps to install this tie down.

 19 This Tie Down is used with the SuperHitch Hero
 20 Will not work with aftermarket Mopar rear mounted kick out steps that are mounted under the

- 21 This SuperHitch Original 17K/20K Tie Down is also used with SuperHitch Magnum 20K/30K 22 This Tie Down mounts to the cab mount, you will need to remove the running boards / bed access steps to install this tie down.

 33 Using older one piece SuperHitch, for rear tie down, please call 800.246.8132

 44 Use #C3201 for rear Tie Down when used with C1202 SuperHitch

 25 There are no factory hitch options available for this vehicle. Hitches installed on this truck were

- dealer installed aftermarket hitches. Please search for your rear tie downs under the AfterMarket column.
- 26 Designed to be used with the OEM cross tube that comes installed on the vehicle without a hitch receiver from the factory.

 27 Will not work with Hidden Power due to Tie Down design.
- 28 Works with NO running boards / bed access steps, including the ones that are just under the cab. If you have running boards / bed access steps under your cab, you will need front tie down
- 29 Works with any factory running boards / bed access steps, including the ones that are just under the cab.
- 30 Due to compressor location this Tie Down can't be installed with factory airbags
- H Indicates that drilling will be required. The number following designates the total number of holes drilled for installation. (example: H4=4 holes drilled)

Choose your Rear Tie Downs:

If the vehicle has a rear hitch, please select which type of hitch

Footnotes

- SuperHitch Magnum 20K/30K requires the use of Tie Down R3504 or Talon Tie Down R3504A
- Drilling may be required into the Spring Hanger Bracket which is welded to the frame
- Drilling may be required for Installation

 May require modifications to the running board / bed access steps brackets to install Tie
- Additional labor required for installation of Tie Downs
- Front Tie down is available in adjustable Tie Down style only
- Fits Classic Body Style only
- Will also work on vehicles without a hitch receiver
- The Toyota HD Tow package attaches to the side and bottom of the vehicles frame. The Standard Toyota Tow package attaches to the bottom of the vehicles frame only
- 10 To determine the correct fit: 1500 & 2500 model / Classic body style vehicle owners must measure the vehicle frame height at the back of the truck next to the spare tire. If the frame is 5.5" tall it requires the LD application, If the frame is 8" tall it requires the HD application
- 11 Will work with aftermarket hitches that do not have side plates that attach to the bottom of the frame 12 Tie down requires 4"x4" footprint on the side plate of the aftermarket hitch in order to install.
- Drilling is required for install. Works on vehicles without a hitch reciever
- 14 Dually applications may require the use of (#A7004 Dually Adapter Kit) Measure from front of camper slide in point to the rear anchor point. If total is 90" or less, use Dually Adapter Kit
- 15 Requires a Factory installed hitch reciever with an open ended cross tube

- 16 Designed to work with the factory installed running board / bed access steps that extends past the cab and onto the bed, Tie Down is not adjustable in height.

 17 SuperHitch Magnum 20K/30K D1102M requires R3503/R3503A rear tie downs SuperHitch Magnum 20K D1101M requires R3503/R3503A Rear TD

 18 Toyota Tacoma's with a 5' bed & running boards / bed access steps under the cab will need to
- remove the running boards / bed access steps to install this tie down.

 19 This Tie Down is used with the SuperHitch Hero

 20 Will not work with aftermarket Mopar rear mounted kick out steps that are mounted under the
- bumper
 21 This SuperHitch Original 17K/20K Tie Down is also used with SuperHitch Magnum 20K/30K
- 22 This Tie Down mounts to the cab mount, you will need to remove the running boards / bed access steps to install this tie down.

- 23 Using older one piece SuperHitch, for rear tie down, please call 800.246.8132
 24 Use #C3201 for rear Tie Down when used with C1202 SuperHitch
 25 There are no factory hitch options available for this vehicle. Hitches installed on this truck were dealer installed aftermarket hitches. Please search for your rear tie downs under the AfterMarket column.

 26 Designed to be used with the OEM cross tube that comes installed on the vehicle without a
- hitch receiver from the factory
- 27 Will not work with Hidden Power due to Tie Down design.28 Works with NO running boards / bed access steps, including the ones that are just under the
- cab. If you have running boards / bed access steps under your cab, you will need front tie down
- 29 Works with any factory running boards / bed access steps, including the ones that are just
- 30 Due to compressor location this Tie Down can't be installed with factory airbags H Indicates that drilling will be required. The number following designates the total number of holes drilled for installation. (example: H4=4 holes drilled)

ALUMINUM TIE DOWNS

STEP 1

Choose your Front Tie Downs:

Does the truck have running boards that extend past the cab and onto the bed?

Coil Rite Kit

AIR ACCESSORY SYSTEMS

The Firestone air accessory systems provide an instant air source for all air suspension products. Simply flip a switch and adjust the ride for various load and road conditions. We also carry air accessory service parts and individual components, providing you with a wide variety of air control assist solutions.

Fig. 1

		Staridar a Daty
Part #	Fig.#	Description
2158	1	This kit features a single white-face gauge and standard-duty
		compressor (9284). Ideal for light towing applications.
2178	2	This kit features a dual white-face gauge and standard-duty compressor
		(9284). Ideal for light use on off-center loads such as: Slide-in campers,
		vans and motorhomes.
2491	-	This kit provides fingertip control of your air springs using a light duty

Standard Duty

compressor (9377). Inflates two bags indiviually, digital.

This <u>wireless</u> kit provides fingertip control of your air springs using a standard duty compressor (9377).

Fig. 2

Heavy Duty

Part #	Fig.#	Description
2097	-	This kit features a single white-face gauge and heavy-duty compressor
		(9285). Ideal for frequent usage on towing applications.Kit includes:
		Single gauge, HD compressor, air line, fittings, filter and fasteners.
2219	3	Kit includes: Dual gauge, HD compressor (9285), air line, fittings,
		filter and fasteners. Ideal for use on off-center loads such as: Slide-in
		Campers, Utility vehicles and Motorhomes.
2168	4	This kit features a dual white-face gauge, heavy-duty compressor
		(9285), air reservoir and a 25-foot inflation hose for emergency tire
		inflation. Ideal for use on: Tow trucks, off road applications and
		motorhomes.
2047	-	These kits are compressor (9285) and air tank combinations. Gauges

Fig. 3

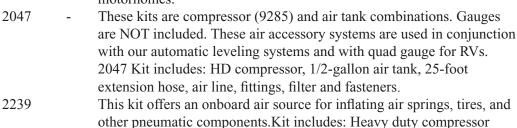

Fig. 4

Super Heavy Duty

(9285), 3 gallon air tank, and a 25' extension hose with inflation wand.

Fig. 5

Part #	Fig.#	Description
2198	5	This kit features a dual white-face gauge, 1-gallon air reservoir, super
		heavy-duty air compressor (9285) and a 25-foot extension hose for
		emergency inflation or tires or other inflatables. Ideal for use on: Con-
		struction vehicles and Motorhomes.

(1) A7310 StableLoad is a NO DRILL APPLICATION and requires factory pre-drilled 1/2" diameter holes in lower overload spring. The A7310 Quick Disconnect StableLoad is designed for vehicles that have a lower overload leaf suspension with a hole near each end of the lower overload spring. The lower overload will for the most part be shorter, thicker and will generally have separation from the rest of the spring pack. In most cases, there will be a plastic disk covering the hole in question. (2) A7311 (WITH DRILL KIT) will fit any passenger or commercial vehicle, Van, SUV, Truck, RV etc, with rear leaf springs and lower overload spring. The lower overload leaf can be identified by being on the very bottom of the spring pack, being thicker than the rest of the leaf springs in the spring pack and generally speaking having a gap between the lower overload leaf spring and the

- -Drilling four 3/8 holes required. Specially treated drill bits and detailed drilling instructions are
- -Average drill time is 30-40 minutes for complete installation
- -Many factory overload springs come pre-drilled with 1/2" holes.
 Therefore, drilling holes in the overload springs in the same factory locations found on vehicles with pre-drilled holes will have no affect on your springs integrity or operation. The drilled springs (when drilled in accordance with the Torklift International drilling specifications) and the integrity of the springs once drilled are covered under the Torklift International Legendary Lifetime Warranty.
- Some overload springs may have adhesive padding on top of the overload spring, Use a screwdriver or equvilant to remove the padding. This will ensure proper rotation and ease of use.

- (3) The A7200 is a NO DRILL APPLICATION and must have factory installed upper overload.
 -Will not work in conjunction with SuperSprings
- -Due to factory overload engagement design, some applications have progressive engagement, where rear springs will contact first.
- -Drilling of rubber pad on some older Dodge applications may be required. -Depending on the vehicle model, suspension package and condition, actual distance between the StableLoad and vehicle frame overload contact bracket may vary. In some rare instances, when the vehicle is not carrying a load, the StableLoad may come into contact on occasion due to rough road conditions and other anomalies. (#A7201 Spacer kit) is available for vehicles that need additional spacing for the StableLoad to contact the
- (4) On Quick Disconnect StableLoad (part#'s A7310/A7311) Due to wear and tear after time, some vehicles leaf springs may have minimal clearance with the lower overload for StableLoad engagement / disengagement when the vehicle is unloaded. In order for the vehicle's StableLoad to engage and disengage with minimal effort, a minimum gap of 1/8" is required between the lower overload and the spring pack. (5) There is no fit for the 3500/E350 Cab and Chassis.
- (6) If your Nissan Titan has an axle wrap bracket located at the rear of the lower leaf spring, A7310/A7311 StableLoads will only be installed on the front of the driver and passenger
- (7) Due to clearance issues, the StableLoad will only work on the rear of the spring.

ATWOOD AIR CONDITIONERS

ATWOOD AIR CONDITIONERS

Atwood Air Command Air Conditioners were designed, tested, and proven in the Australian "Outback" to withstand rigors of the harshest elements. Models feature either 16K BTU or 18K BTU equivalent performance, Super V-Flow air distribution, digital thermostat, remote control (18K), and an independent dual motor design... even heat pumps come standard in 18K models! Air Command's durability, function, and features are unlike anything else on the market today.

Rooftop Unit Dimensions (W) 26.5" x (H) 13.6" x (L) 39" Roof Cutout 14" x 14"

Description
16K BTU, Non-Ducted, 330 CFM
16K BTU, Ducted w/ Remote, 330 CFM
18K BTU, Non-Ducted, 330 CFM
